Vehicle equipment

# TANOS<sup>®</sup> mobil

## Flexible vehicle equipment

- Easy and fast self assembly and removal
- No drilling or fitting in the vehicle necessary
- No drilling or complicated fitting in the vehicle necessary
- Removable without leaving any damage in the vehicle
- High quality manufactured materials used
- Low weight, high stability and loading capacity
- Flexible design that can be adapted any time to any new situations either vehicle upgrade or special cargo
- High durability: can be used for several generations of vehicles
- Flexible and variable placement possibilities: ideal with systainer<sup>®</sup>, euroboxes, all common containers
- Improves the organisation and efficiency which saves time and money
- Safety: DEKRA certified and crash tested

TANOS®mobil

patented

## Intelligent cargo securing

Every year, unsecured and disorganised cargo causes damages amounting to millions, often with serious consequences.

The patented **TANOS®mobil** system secures your cargo and is light weight, durable and simple to install.

Crash tests with our system demonstrated high stability due to the extremely durable and resilient components.

**TANOS®mobil** can be installed easily into any vehicle equipped with a standard bulkhead. If the vehicle has a ceiling lining, this must be removed before assembling the TANOS®mobil system.

Thanks to simple combination, the module principle offers you endless and effective possibilities.

## Installation options

You can easily and comfortably secure the cargo and professionally organise it in the vehicle. Initial installation can be performed with a few easy grips. If required, the shelf can be completely removed from the vehicle without any tools, within a very short time. This is particularly advantageous if the vehicle is used variably and when the complete loading area is needed.

**1** Adaptor unit with quick release for adjustment without any tools

**2** Adaption to the roof of the vehicle using self-adhesive fleece, velcro mat with an adaptor, spacer tube and adaptor unit

**3** Shelves with different depths and widths are available and inclination is possible by means of the triangle girder

**4** Location to the floor of the vehicle using the self-adhesive fleece and velcro mat with an adaptor. A floor plug-in part and spacer tube support the system

## Optional accessories

Extend the **TANOS®mobil** system with useful complements for load securing.

**Safety strap**  
for attaching additional cargo to the **TANOS®mobil** shelf system

**Ring nuts and karabiners**  
for attaching safety straps or other straps

**Anti slip mats**  
for extra security of the cargo in the shelves

**Dividers for L- and U-profiles**  
for variable division of the shelves

**Star grip M8**  
for tool-free, variable positioning of the dividers

**Brace support**  
for increasing of the load carrying capacity of the shelf

**Cover**  
for protection of the fleece when the shelf system has been removed to use the complete cargo area

## The systainer® product family

Get your vehicle organised with the help of the multifunctional transporting, organising and packing system – the systainer®.

The design of the systainer® product family guarantees flexible adaption to a variety of needs.

The linkability and combination of all systainer® sizes and the multifunctional accessories offer numerous application possibilities.

Lockable strongboxes enable safe, stable and clearly arranged storage of the systainer® in your vehicle.

The removable drawers facilitate quick access to the contents of the strongbox.
